

Arseus Medical Group strengthens its position in the Netherlands in the cardiovascular and endovascular division through acquisition of TD Medical BV in Eindhoven.

Eindhoven, June 1, 2024:

Arseus Medical, market leader in the distribution of medical equipment, medical devices and services to the medical sector, takes an important step in its growth strategy with the acquisition of TD Medical BV, a Dutch distributor of innovative and high-tech cardiovascular and endovascular products.

Walter Raes, CEO of Arseus Medical Group, commented: *“The acquisition of TD Medical gives us the opportunity to expand our knowledge and product portfolio in the field of cardiovascular and endovascular interventional techniques. By joining forces with TD Medical today, we strengthen our position as a leading distributor of innovative medical devices in the Benelux. We now have an unique offering and extensive expertise in cardiovascular and endovascular interventional techniques. We are very pleased that the current team at TD Medical will join us in shaping and realizing this growth in the future.”*

Willem Thehu, founder and CEO of TD Medical, said: *“Since the founding of TD Medical in 1982, we have become an established name in the field of cardiovascular disease through the introduction of many new interventional techniques. We have built a strong market position through exclusive global partnerships with the world's leading interventional cardiology, radiology and vascular surgery companies, the dedication of our entire team and the unique expertise of our employees. We are recognized again and again for our creativity, our personal service, our nose for innovation and our constant striving to improve the quality of care and quality of life for patients. In Arseus Medical Group we have found the right strategic partner to ensure continuity and growth and to further expand our goals in the future. After 42 years, I will leave the company but remain available in the background for the management at all times.”*
